To Whom It May Concern,

New Hanover County has an outstanding relationship with CBHF Engineers. We have worked with the firm on numerous projects large and small. One of our largest projects that CBHF helped us with was the New Hanover County Health & Human Services Facility located at 1650 Greenfield Street in Wilmington. This facility replaced 3 of our existing buildings and facilitated the merge of our Health department and Social Services department. CBHF was the plumbing, mechanical, and electrical engineer working as a team member with Sawyer, Sherwood & Associates.

The professionals at CBHF did an outstanding job of understanding our needs (both present and future) which led to the highly efficient and functional space we now have. We have been in the building for more than 2 years now and have had no issues at all. I highly recommend CBHF to anyone that needs a great MEP engineer that can deliver.

Sincerely,

Kevin Caison

Kevin Caison, NHC Facilities Project Manager
